

CENTROVANCE AI

SHAPING GREATNESS IN EDTECH

PROJECTED EXIT VALUATION: \$7,500,000,000.00 (7.5 Billion USD)

EXECUTIVE SUMMARY

Revolutionizing assessment and recruitment through intelligent automation — from primary school classrooms to the world's leading universities and global corporations.

THE CHALLENGE

- **Inefficiency:** Manual testing and grading is time-consuming, inconsistent, and prone to human error.
- **Security Risks:** Institutions struggle to curb cheating and maintain standardization across exams and interviews.
- **Feedback Gaps:** Interview and recruitment evaluations lack automation and rapid feedback systems.

THE CENTROVANCE AI SOLUTION

Centrovance AI introduces a proprietary, full-stack assessment ecosystem designed to automate the entire lifecycle of evaluation.

- AI-powered testing and interview system supporting question uploads with auto-answer generation.
- Instant grading and feedback mechanisms.
- Multi-layered anti-cheating technology involving device detection and facial recognition.
- Universal applicability across education sectors and corporate recruitment.

MARKET DYNAMICS

- **EdTech Market Growth:** Projected to reach \$589,000,000,000.00 (589 Billion USD) by 2034.
- **Corporate E-Learning:** Projected to reach \$325,000,000,000.00 (325 Billion USD) to \$956,000,000,000.00 (956 Billion USD) by 2035.

Centrovance AI targets a diverse sector including Universities, Polytechnics, K-12 education, and global recruitment firms.

KEY TECHNOLOGICAL PILLARS

- **Proprietary Architecture:** Built from scratch without API dependencies.
- **Adaptive Interfaces:** UI that adjusts based on user age and organization type.
- **Advanced Security:** Dual-layer anti-cheating (Face + Device).

CORE FEATURES

- Upload portal for questions/answers with optional auto-generation.
- Unique ID + facial recognition verification for secure testing.
- Device detection and cheating control protocols.
- Multi-level modes: Primary, Secondary, and Tertiary education levels.
- Organization-specific tracking linked to existing databases.
- Past Questions (PQ) feature for comprehensive preparation.

DEVELOPMENT ROADMAP

Timeline	Strategic Milestone
July – Dec 2026	Full Development Kickoff
Dec 2026 – May 2027	MVP Completion, Testing, and Post-Development Demo
May – July 2027	Global Pitching and Acquisition Phase

TARGET INSTITUTIONAL LANDSCAPE

Our go-to-market strategy identifies top-tier global entities for early adoption and acquisition:

Harvard MIT Yale Google Meta Huawei

Shape the Future of Assessment

Early partners and buyers are invited to join the global shift in intelligent recruitment and standardized education.

Centrovance AI is the most reliable, efficient, and scalable system ever developed for global human capital evaluation.
